

Teddy Bear Car

You will need:

- Empty cereal box
- Wrapping paper or coloured paper (optional)
- Piece of dark coloured card
- Piece of yellow card
- White glue (such as PVA)
- Glue spreader or brush
- Scissors
- Sticky tape
- A teddy bear

What To Do:

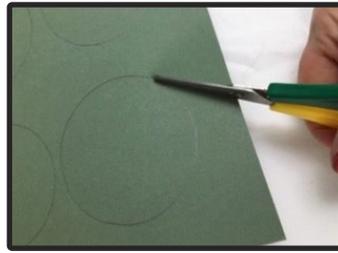

Tape up the open end of your box using sticky tape.

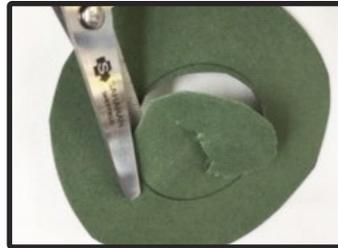

Cut a rectangle out of one side of your box, leaving a hole big enough for your teddy to fit in.

Cover your box with old wrapping paper or coloured paper. Stick it down with glue.

Cut out 4 wheels from the dark coloured card. You could use a jar lid as a template.

Cut a smaller circle in the centre of each wheel. A bottle top makes a good template.

Glue the wheels to the sides of the car.

Cut out 2 small circles from yellow card for the lights.

Glue the lights to the front of the car.
Your teddy is ready to go!
